

Source/output checkpoint fixture

Figure 1. Source flowchart

The result sentence continues across a column break.

Pseudocode

```
for each source line:  
    compare source and rendition  
    keep the named property visible
```

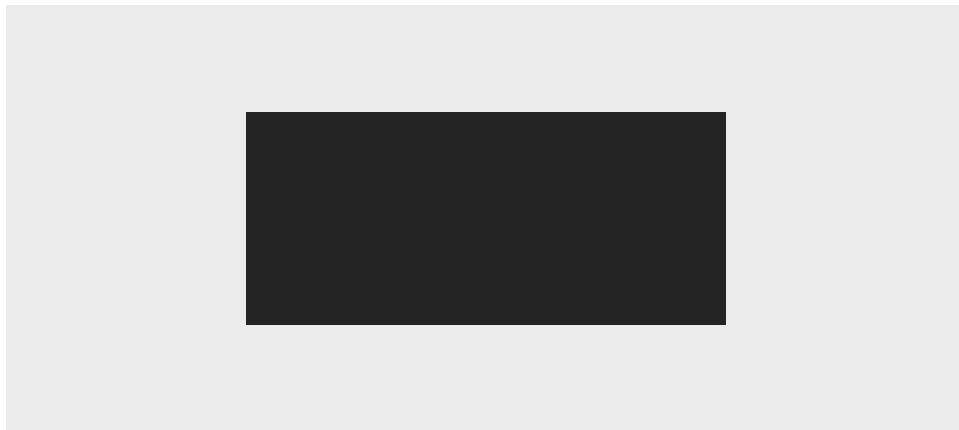

Figure 1 caption stays below the source flowchart.

A second result sentence runs off the bottom of this
page and

continues at the top of the next one without losing its clause.

The high-resolution photo-graph is attested elsewhere as photograph.

Not a heading and **not bold** and {placeholder} stay literal.
