

Synthetic semantic completeness fixture

Left column line one introduces the experiment.	Right column line one follows the left column.
Left column line two preserves source order.	Right column line two describes the visual result.
Left column line three points to Figure 1.	Right column line three introduces the fallback.
Left column line four has footnote reference 1.	Right column line four closes the main reading flow.

Figure 1. A synthetic image and its semantic caption.

Table 1. Synthetic values require a table fallback.

Equation 1 ($x + y = z$) requires an atomic fallback.

Footnote 1: This note must stay linked to its reference.
